PROFILE

I am a visionary Frontend Developer, I have three years of experience standing out in the development of web and mobile applications through the use of technologies such as JavaScript, TypeScript, React, Next.js and React Native.

My approach is distinguished by my commitment to continuous updating, staying abreast of the latest technologies.

I specialize in developing efficient and engaging applications, customizing solutions to meet specific client needs.

I am a passionate developer dedicated to technology, innovation and collaborative teamwork. My goal is to continue driving change and developing innovative solutions that drive business growth and improve the lives of people around the world.

EXPERIENCE

Apr 2023 - Agu 2023   **Front-End Developer, ITGlobers**   Bogotá, Colombia

I collaborated in the development of e-commerce platforms for leading companies such as Éxito and Pepe Ganga, using Frontend, Backend and Vtex technologies.

Participated in the successful implementation of REST API with Node.js and Express, improving communication between system applications.

I contributed to the development of mobile applications with React Native, improving accessibility and user experience on various platforms.

Apr 2021 - Mar 2023   **Front-End Developer, Lean Tech**   Medellín, Colombia

I actively participated in web and mobile development projects for American logistics companies, applying my skills in React, React Native, Next.js, CSS, JavaScript and TypeScript.

My featured work mainly focused on excelling in the field of design and optimizing user experience.

In 2021 I was recognized as one of the top 10 collaborators of the year.

SKILLS

JavaScript	React Native
TypeScript	Node Js (Experienced)
